

AI-powered qualitative research.

Built for every team size.

InspHERA automates the mechanical work of qualitative analysis — language detection, translation, thematic coding, and cross-transcript synthesis — so researchers can focus on interpretation and insight. Choose the plan that fits your current workload, and scale when you need to.

Contact hello@insphera.ai

All plans include AI transcript analysis, thematic coding, cross-transcript synthesis, PDF export, and full inline editing. Contact us to discuss pricing and terms.
